

Mitac Globalink Internship Project

Mitacs is a not-for-profit organization that has designed and delivered research and training programs in Canada. Pakistan has been included in the subject program for the first time. Mitacs offers 12 weeks' research internship program for UG (enrolled) students to develop their research expertise and professional skills under the supervision of Canadian University faculty. Details of the prog can be viewed from the link and the document (attached).

All depts are requested to communicate info to their prospective/ interested students to submit their proposal on the given topic to their respective dept first for scrutiny and approval from respective HoDs. Thereafter, prospective/ approved applicants will have to submit/ upload their approved doc on web portal (https://www.mitacs.ca/en/programs/globalink/globalink-research-internship?qclid=Cj0kxYsqOP7Cko_Pu2Le8SoAD54XUz1HIEUaP3pM0aAhyDEALw_wcB#student-application)

It seems a good opportunity for young researchers of BS prog. Therefore, respective HoDs may encourage and guide their respective students about the preparation of proposal which dept can evaluate for further submission of application on the a/m link. It is further hi-lighted that no such proposal be submitted/ uploaded unchecked on the portal.
