Q.1. It is observed that in Pakistan, water as a resource is decreasing quickly and the country may face acute water scarcity by the year 2025. This situation in future may cause the country as one of the most water-stressed country in South Asia within two decades. How do you see the situation? What are the various options for Pakistan to overcome this upcoming challenge?

Q.2. Unemployment Rate in Pakistan may increase further by the end of 2021, according to Trading Economics Global Macro Models and Analysts Expectations. This increase may cause high poverty and inflation in Paksitan that can further impact the overall economy of the country. Elucidate the existing conditions and suggest what pertinent strategies, the leadership of the country may employ in this scenario.

-----Good luck-----
